

Is the Tesla Solar Roof still alive?

Tesla aimed for the solution to be competitive with higher-end roofing options, but it remains expensive and much less affordable than many durable roof options, plus solar panels. In short, the Tesla Solar Roof is still alive, but it's nowhere near the revolutionary product Tesla claimed it would be.

What is a Tesla Solar Roof?

One of the biggest advantages of the Tesla Solar Roof -- and other shingle-style solar technology -- is that it's much more flexible than panel-based systems. Solar tiles are significantly smaller than panels, so they can fit into more configurations than a standard solar system can accommodate.

Is Tesla giving up on installing solar roof tiles?

Tesla shifted its focus on deploying Powerwalls and solar inverters through third-party installers. The same thing is happening with Tesla's solar roof tiles. The company appears to be giving up on installing them itself, but some installations are still happening with third-party certified installers.

Where does Tesla manufacture solar roofs?

Tesla manufactures its solar roofs in its New York Gigafactory, which gives it some points in this category. The solar industry has problems with sustainability throughout its supply chains, and tracking those supply chains is much easier for companies that manufacture products in the United States.
