

Thailand aims to achieve carbon-neutrality by 2050 and net zero by 2065, while ensuring energy security and affordability. Scaling up renewables is the most economic pathway for Thailand to ...

BNEF's Net Zero Scenario shows that solar and wind can supply 60% of Thailand's electricity in 2050 while strengthening the country's energy security and eliminating emissions.

Thailand could easily fall behind in the race to attract long-term investments, particularly from businesses that priorities renewable power. Fortunately, Thailand still has three key enablers for ...

Thailand Green Energy Transformation targets 74% clean power by 2050. Learn how policies, solar growth, and \$50B in investments are driving real change.

Several policies, such as the Thirteenth Plan or the Alternative Energy Development Plan, set future goals for increasing the capacity of renewable energy and reduce the reliance of nonrenewable ...

This report hence analyses how Thailand can achieve its clean electricity transition, by comparing the planned trajectory of the PDP with the emissions targets, and providing an assessment of the gaps.

OverviewPolicy and goalsHydroelectricitySolar energyWind energyBiomass energy Renewable energy in Thailand is a developing sector that addresses the country's present high rate of carbon emissions. Several policies, such as the Thirteenth Plan or the Alternative Energy Development Plan, set future goals for increasing the capacity of renewable energy and reduce the reliance of nonrenewable energy. The major sources of renewable energy in Thailand are hydro power, solar power, wind power, and biomass, with biomass currently accounting for the majority of production. Th...

Thailand is accelerating a just energy transition to meet growing electricity demands, reduce greenhouse gas emissions, and achieve carbon neutrality by 2050 and net-zero emissions by ...

The Roadmap provides a comprehensive overview of the progress to date, policy context and challenges to mobilise near-term finance in those sectors, as well as estimates of the finance needs ...

Thailand is stepping into 2025 with real momentum. Big new projects, a clear national direction, and smarter grids are turning clean power from promise to practice.
