

Will China's new energy storage sector become a global leader?

The country's new energy storage sector, which is currently in its early stages, is expected to evolve from a nascent market player to a global leader in the coming years, they said.

Are innovative storage technologies the future of energy?

With demand for clean, reliable and efficient energy continuing to climb, companies pioneering innovative storage technologies have a spotlight shone on them to ensure the future and success of the energy landscape.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

Who is Highview Power?

Highview Power is a leading provider of long-duration energy storage (LDES) technology. The company is actively developing large-scale energy storage facilities, such as the Hunterston project in the UK. Its exclusive focus on Liquid Air Energy Storage (LAES) addresses the requirement for long-duration storage without relying on batteries.

ETN commemorates the World Energy Storage Day (September 22) with a special section dedicated to the visionaries and promoters of energy storage globally. Following are brief ...

The emergence of new energy storage leaders signifies a transformative shift in managing energy resources and addressing sustainability challenges in contemporary society. As these ...

The country's new energy storage sector, which is currently in its early stages, is expected to evolve from a nascent market player to a global leader in the coming years, they said.

"China's advances in new-type energy storage are moving from isolated breakthroughs to a more systematic framework," said Rao Hong, chief scientist at China Southern Power Grid. Lithium ...

Companies that deliver sub-3-minute response times and full-stack support are setting a new bar for what "operations" means in energy storage. Looking ahead, BESS deployments are forecast to ...

KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ("CEC") released the New Energy Storage Technologies Empower Energy ...

Let's face it - the world's energy game is changing faster than a Tesla Model S Plaid hits 60 mph. With renewable energy sources projected to supply 50% of global electricity by 2030 ...

On December 4, 2025, the "2025 China Energy Storage CEO Summit & the 10th International Energy Storage Innovation Competition - Preliminary Round" was successfully held in Xiamen.

In this week's Top 10, Energy Digital takes a deep dive into energy storage and profile the world's leading companies in this space who are leading the charge towards a more sustainable ...

The article discusses top 10 energy storage companies that are working on new solutions to support global energy needs.
