

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include 36,000 solar panels across 52 hectares, along ...

Togo is set to pilot a green energy storage program after the French Development Agency and the Global Energy Alliance for People and Planet (GEAPP)

Announced in Washington during the IMF and World Bank Annual Meetings, the 55 MW project supports the national "Mission 300" plan to achieve universal electricity access by 2030. Togo ...

A solar PV plant with a battery energy storage system in Togo is set to expand its capacity to provide electricity to thousands more households.

Togo launches a pilot green energy storage program to boost renewable power and achieve universal electricity access by 2030.

By adding a 55 MW battery system, Togo can store the excess energy generated by the Blitta plant during the day and dispatch it during evening peak hours or periods of low solar ...

Togo is launching a pilot battery energy storage project to stabilize its national grid and accelerate the country's shift toward renewable energy.

The French Development Agency and the Global Energy Alliance Initiative have jointly invested \$200,000 to support a battery energy storage system pilot project in the Togolese Republic. ...

The funding will back a 55 MW battery pilot project that can be replicated across Africa as well as development of a national storage roadmap for Togo. The Togolese government wants to ...

This agreement will finance feasibility studies for a battery energy storage system (BESS) project in Togo - a crucial step to integrate more renewable energy and achieve universal access to ...
