

Existing and future transmission and distribution lines are shown ranging from 90kV to 400kV. Actual and planned cross-border interconnectors are also shown including the Elmed ...

Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro.

Overview
Electrical sector and renewable energies
Oil and gas upstream sector
Downstream sector
Nuclear
The International Energy Agency reports for 2014 an electricity production of 19 TWh, compared to 10.5 TWh in the year 2000. The Tunisian Company of Electricity and Gas (STEG), a public company, ensures the three quarters of production. The network operates at 50 Hertz and the voltage at the domestic level is 230 Volts. Virtually all Tunisian electricity (18 TWh) is produced by thermal power plants burning natural gas, the l...

The Tunisia Power Market refers to the industry involved in the generation, transmission, distribution, and sale of electricity across the country. It includes power plants, utility companies, regulatory ...

Tunisia mostly relies on gas imports to meet its primary energy needs: almost 97% of its electricity generation came from gas in 2016. However, energy policy puts the emphasis on renewable energy. ...

Main nodes and major lines of the electricity transmission network of Tunisia. Interconnection lines with neighboring countries included. The properties for nodes are "name"; and ...

Much of Tunisia's electricity production comes from gas turbines. Major players in this sector include General Electric (USA), Mitsubishi (Japan), Ansaldo (Italy), and Siemens (Germany). ...

In addition to their function to meet a perpetual growing demand, the new works will allow us to minimize the risks of obsolescence and to prepare our network to play its role as a link in a large system inter ...

Electricity Maps relies on open public electricity data. We strive to process and organize this data with scientific integrity. We communicate transparently about our sources and methods. For ...

- Tunisia's Energy Companies: STEG dominates Tunisia's electricity and gas sectors, while ETAP leads in oil and gas. STEG manages generation, transmission, and distribution, with a vast network and ...

Le projet a pour objectifs spécifiques l'amélioration de la sécurité d'alimentation et de la qualité de service à la clientéle et de la sécurité du personnel de la STEG et des tiers ainsi que la préservation ...
