

"It's great to have supported Cero Generation with the financing of their latest portfolio of co-located solar and BESS projects," said Sylvan Jonker, Head of Renewables & Power NL at ING.

Explore British Solar Renewables' battery storage projects. We help drive energy security and the UK's clean energy future.

The specialist global investment manager revealed the Kent-based project, which consists of 373MW of solar and "more than" 150MW of battery energy storage, is expected to be fully ...

Solar Energy UK has published a series of case studies that highlight some of the solar and battery energy storage sector's best projects. Among our members' submissions is the UK's ...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...

Three new UK battery energy storage systems (BESS) and a 150 MW capacity solar farm have won government approval. The Scottish government has given Kona Energy the green light for ...

This edition of the EnergyPulse report on Energy Storage shows there is 8.7GW of batteries in operation and under construction and more than 30GW projects have now been consented.

The energy capacity of new battery, wind, and solar projects that received approval climbed to 45GW this year, 96% higher than in 2024, according to data from Cornwall Insight.

Activity in the UK battery energy storage system (BESS) market continues to grow substantially year-on-year despite numerous headwinds, as detailed in this H1 recap from our Market ...

Ofgem is today (Tuesday 23 September) confirming the 77 projects entering the final assessment stage of a government-driven "super battery" support scheme designed to secure investment, promote...
