

The humanitarian organization, Hope for Ukraine, is expanding its solar power and electric cookstove program to help Ukrainians in need to be able to cook food.

Solar power plants installed at three water and wastewater utility sites in Chortkiv, Western Ukraine, support uninterrupted water services to residents. It is the first solar energy project ...

Wind farms and solar projects are already changing how Ukraine generates electricity. This guide explores eight groundbreaking renewable energy projects across Ukraine. You'll discover how solar ...

Our goal is to tackle widespread power outages in hospitals and schools with solar power, as a reliable, versatile, and easily deployed clean energy source. You can make a difference right now by helping ...

Households in Ukraine tend on average to have larger rooftop solar PV systems than in other countries. The feed in tariff is available for larger systems and from 2020 may be up to 50 kW and can be both ...

Hope for Ukraine (HFU) is proud to announce a significant milestone in our Solar Energy Resilience Initiative. Our largest shipment of solar generators to date--680 units--is now being ...

The Power Up Ukraine program aims to provide resilient power to critical facilities like hospitals, field clinics and humanitarian hubs in Ukraine by equipping them with quality, safe lithium battery ...

Tech4Good Global Challenge #1: Energy for Ukraine is proud to announce the deployment of MY SOLAR PLANT by Xizan Energy, an innovative dual-use solar generator invented ...

Footprint Project is working through on-the-ground partners in Ukraine to distribute and maintain solar generators to critical medical equipment, lighting, communications and relief needs.

But as outage patterns persist, more companies are asking whether a solar plus storage setup can replace a generator in part or in full, and under what conditions it is financially rational.
