

Historically reliant on coal, PGE is now investing heavily in battery storage, wind, and solar energy to support Poland's shift toward sustainability. The company operates some of the ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into ...

Axpo and Energix, a leading renewable energy developer and independent power producer (IPP), have signed an agreement to optimise the largest battery energy storage system (BESS) in Poland.

This article emphasises the top 10 energy storage companies in Poland, illustrating those that are at the forefront of promoting energy flexibility and decarbonisation.

Polish utility PGE has announced plans to allocate around USD 4.7 billion for battery storage projects.

Poland's energy storage landscape has become a battleground between ambitious climate targets and practical grid economics. With 9GW of battery projects already permitted but only 10MW operational ...

In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by ...

As Poland continues to transition from coal-fired power plants to renewable energy sources, the need for reliable energy storage solutions becomes increasingly critical.

Whether you're building new teams in Poland, scaling battery expertise across Europe, or navigating green investment programmes, we're here to help power your workforce strategy.

Poland has awarded public support to 172 large-scale battery storage projects totaling 14.5 GWh, with construction required to be completed by the end of 2028.
