

The firm capacity delivered by Victoria's energy storage targets will provide reliable, affordable and clean energy as Victoria's ageing and increasingly unreliable coal generation is ...

The government of Victoria has awarded fast-tracked approvals for two new battery energy storage system (BESS) projects with a combined capacity of 700 MW, it said on Monday.

Victoria, Australia, achieved a new battery energy storage system (BESS) discharge and charge record over the weekend, with 693.5MW and -704.8MW, respectively.

Australia's Victoria government has fast-tracked a 400MWh battery energy storage system (BESS) and 500MW solar-plus-storage project via its Development Facilitation Program (DFP).

The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant with integrated storage in ...

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of projects to ...

The State Government of Victoria has accelerated ACEnergy's battery energy storage system (BESS) initiative in Little River via its Development Facilitation Programme. The BESS ...

Touted to be one of the largest battery installations globally, the hub can supply electricity to as many as 200,000 households during the evening peak demand period in Victoria.

NEWS: A massive new \$450 million Tesla Megapack battery energy storage system is now operational in Victoria, Australia. It's the biggest completed battery project on Australia's main ...

Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient. Our modern energy ...
