

A digital object identifier (DOI) is a persistent identifier or handle used to uniquely identify various objects, standardized by the International Organization for Standardization (ISO). [2]

What is a DOI? A DOI is a digital identifier of an object, any object -- physical, digital, or abstract. DOIs solve a common problem: keeping track of things. Things can be matter, material, content, or ...

What is a DOI? A digital object identifier (DOI) is a unique string of letters and/or numbers that is assigned to online resources like journal articles, data sets, and technical reports. A DOI is ...

This guide is a general introduction to Digital Object Identifiers (DOIs). Digital Commons supports the display of DOIs for any content as well as DOI registration support for certain types of DC journals.

A DOI (Digital Object Identifier) is a unique and never-changing string assigned to online (journal) articles, books, and other works. DOIs make it easier to retrieve works, which is why citation ...

What is a DOI (digital object identifier)? A DOI is a character string that can be assigned to an online article, book, or other source. If the location of the source changes, the DOI remains stable, which ...

What is a DOI and how do I use them in citations? A DOI, or Digital Object Identifier, is a string of numbers, letters and symbols used to uniquely identify an article or document, and to ...

What is a DOI? A DOI, or Digital Object Identifier, is a string of numbers, letters and symbols used to permanently identify an article or document and link to it on the web.

A Digital Object Identifier (DOI) is a unique alphanumeric code assigned to a digital object, which can encompass various types of data such as images, videos, sound, and text publications.

DOI stands for "digital object identifier." Also known as a permalink, a DOI is an article's permanent online location. DOIs are used for a variety of academic and non-academic sources that are located ...
