

Are solar and wind stocks still a good investment?

Solar and wind stocks still have something to offer despite U.S. funding cuts. Despite fading policy focus, clean energy remains key to climate action and a smart long-term ETF investment.

How many wind energy companies does a wind energy fund hold?

It holds two types of wind energy companies: Pure-play companies that get at least 50% of their revenue from wind-related activities (60% of the fund). Diversified companies that have some involvement in the wind industry (40% of the fund). This fund had about 45 holdings in late 2025, led by the following five:

What is the Invesco solar ETF?

The Invesco Solar ETF focuses on companies in the solar energy industry. That includes companies that manufacture panels and electrical components and install solar energy systems. The ETF had almost 30 holdings as of late 2025, led by the following five:

Should you invest in a green energy ETF?

An ETF reduces the risk of being right on the thesis but picking the wrong stock. Image source: Getty Images. Many ETFs focus on clean energy these days, given the amount of money flowing into the sector. Some take a broad approach by investing across the entire industry, while others focus on a single aspect of green energy investing.
