

Wind power minimum power generation guarantee

In response to the challenges of low wind power consumption and high pollution emissions from thermal power, the implementation of wind-thermal power generation rights ...

Corporate PPAs allow companies to source renewable energy directly from a generator (utility, independent power producer, investor), ensuring the energy they use is clean, traceable, and aligned with ...

When a wind project is owned by an independent power producer rather than a utility serving its own load, the agreement that provides for an assured source of revenue from the energy output and related environmental ...

The size of a turbine and the speed of the wind determine how much electricity (power) a wind energy system will produce. A small wind energy system has a power output from 400 watts to 100 kilowatts (kW).

In this paper I provide an overview of conflicts over wind wakes and flag recent developments in case law that address this issue. Specifically, I analyze a 2021 Appellate Court of Maryland ruling that ...

This article presents an overview of the adequacy challenge, how wind power is handled in the regulation of capacity adequacy, and how wind power is treated in a selection of jurisdictions.

This guarantee is a standard provision in Power Purchase Agreements (PPAs) for renewable energy projects, particularly wind and solar. The value is set conservatively below the expected energy yield to account for ...

This Wind Energy Guide is meant to provide the reader with an introductory understanding of wind energy technologies and the considerations that affect wind power siting, permitting, and economics.

While this paper focuses on issues that are of most interest to project Sponsors and Lenders, many of these considerations are equally relevant to Contractors. This paper considers these issues in the context of utility ...

Wind and solar generation collapsed during extreme cold while coal, gas, and nuclear kept the lights on for millions of Americans When Winter Storm Fern hit the United States in late January 2026, it ...
